

How does one assure that “never again” can be a strategy as well as a goal? To consider

workshops, and an interfaith prayer service, ending with dinner at one of several mosques. With solid resources and time shared, we hope to learn more about Islam, identify prejudice and bias and consider strategies for confronting Islamophobia in our own community. That prejudice is personal, national, and international. It shapes and is shaped by our media. This event will provide ~~regie~~ and ~~nd f~~ continuing to confront Islamophobia.
